ABOUT ME

I am a software development enthusiast with over five years of experience building diverse applications, including web, mobile, and desktop solutions.

My current professional tech stack revolves around C# .NET and JavaScript/jQuery. Additionally, I have solid experience with frontend technologies, such as HTML, CSS, and bootstrap. That said, I'm always open to learning and working with other languages and tools — this is just where I'm currently most productive.

On a personal level, I am committed to continuous learning, always eager to explore new technologies and expand my skill set.
