About me

Software Developer with 6+ years building web applications with **.NET**, **JavaScript**, and **SQL Server**. I've worked across the full development stack – from building backend APIs to creating responsive user interfaces that integrate seamlessly with .NET MVC.

I'm passionate about problem-solving and delivering quality solutions. Currently expanding my frontend skills with **TypeScript** and **React**, while keeping my .NET expertise sharp with ongoing learning and certifications. I thrive in collaborative environments where I can contribute, learn, and help build products that matter.

Skills & Competencies

BACKEND DEVELOPEMENT

- 6 years professional experience with C# and .NET Framework/Core
- Building RESTful APIs, MVC applications, and business logic layers
- Database design and optimization with SQL Server, LINQ, ADO.NET
- Implementing authentication, authorization, and role-based access control

FRONTEND DEVELOPMENT

- Professional experience with JavaScript, jQuery, HTML5, CSS3, and Bootstrap
- Building responsive, interactive user interfaces integrated with .NET MVC
- Experience with Razor views, partial views, and client-side validation
- AJAX requests and JSON data handling for dynamic frontend interactions
- Currently learning TypeScript and React through personal projects

MOBILE & DESKTOP

- Cross-platform mobile development with Xamarin and .NET MAUI (Android)
- Windows desktop applications (Console and Windows Forms)
- Maintaining and extending legacy applications

TOOLS & PRACTICES

- Version control with Git and Azure DevOps
- Agile development methodologies and sprint planning
- API testing and debugging with Postman
- Visual Studio, Visual Studio Code, SQL Server Management Studio

CLOUD SERVICES

- Basic knowledge of AWS Cloud Services and cloud deployment concepts
- Experience deploying web applications to production environments
- Familiar with environment variables and configuration management

Work Experience

FULLSTACK DEVELOPER

February 2020 - Present

INNEX TECHNOLOGIES

Porto, Portugal

- Developed complaint management system (whistleblower channel) with secure data handling, role-based access controls, and audit logging for compliance.
- Implemented custom ASP.NET Tag Helpers for authorization logic, validating user permissions and enforcing license-based feature restrictions.
- Built and maintain HR management platform (.NET MVC) covering attendance tracking, access control, asset management, and workforce administration.
- Developed and maintain cross-platform mobile applications using Xamarin and .NET MAUI for Android, focusing on access control and time-tracking.
- Contributed to backend services (.NET Core) for commercial ticketing, access management, and employee clocking systems.
- Maintain legacy ASP.NET Web Forms applications, ensuring stability and implementing incremental improvements.

Technologies: **C#, .NET Core, .NET MVC, JavaScript, SQL Server, Xamarin, .NET MAUI, Bootstrap, jQuery, Azure DevOps**

Certifications

DOMTRAIN (2025)

- Cloud Fundamentals: AWS Services for C# Developers
- Integration testing in ASP.NET CORE
- REST APIs in .NET

CODE WITH MOSH (2024)

- React 18 & TypeScript
- TypeScript
- Javascript Unit Testing

MICROSOFT (2020)

- MTA: Software Development Fundamentals

Personal Projects

CLI TOOL - DOTNET-TO-TS | PERSONAL PROJECT | 2026

- Automatically generates TypeScript interfaces from C# classes, avoiding manual copying and keeping frontend/backend in sync.
- Built to expand my knowledge of TypeScript and Node.js, exploring modern CLI and developer tooling.
- **Technologies:** TypeScript, Node.js

 Github: github.com/danielmiranda22/dotnet-to-ts

PERSONAL PORTFOLIO | PERSONAL PROJECT | 2024-2025

- Personal portfolio website showcasing projects and experience
- JSON-driven architecture for easy content management
- **Technologies:** React, TypeScript, Chakra UI, Vercel

 Live: portfolio-by-dano.vercel.app/

GAME FINDER | PERSONAL PROJECT | 2024-2025

- Game discovery web application built with React and TypeScript
- Learning project to explore modern frontend development and API integration
- **Features:** Browse 850K+ games, search/filter, infinite scroll, dark/light mode
- **Technologies:** React, TypeScript, React Query, Chakra UI, Vercel

 Live Demo: game-finder-by-dano.vercel.app/

Languages

PORTUGUESE (NATIVE)

ENGLISH (FLUENT) - TECHNICAL DOCUMENTATION, COMMUNICATION, CODE COMMENTS

Hobbies

SPORTS, GYM, TRAVEL, TRACKING.
